

Dynamic Fire & Security are committed to ensuring our clients are working within the current Covid 19 guidelines while protecting the assets and safety of staff

Due to the COVID-19 pandemic, retail shops will need to comply with Government guidance for Social Distancing restrictions and control the number of customers who enter the premises. Many have responded by assigning staff to control the customer traffic at the entrance, this is an additional overhead and also puts them at risk.

Our Social Distancing self-automated traffic light Entry Control System can help to comply with Safe Occupancy Limits for any store or site and ensure the safety of your Customers and Staff.

Temperature Access control tablet alerts you when someone showing a high temperature tries to enter your premises allowing you to assess before allowing entry.

Please see below further info and more products in this range that we can supply and fit.
