"Caring for your Health" expresses our business ethos to deliver to patients and customers the services and medicines they require in the most efficient and effective manner possible.

ABOUT US

Michael Guerin opened his first pharmacy in 1988, and MediCare Pharmacy Group has grown to become the current largest indigenous pharmacy group in Northern Ireland. Our 700+ staff, including 100 pharmacists, serve some of the most socially deprived communities from our 54 pharmacies across Northern Ireland, and we're hoping to grow even more. We have opportunities for Pharmacists and hope you will consider joining us.

MediCare Pharmacy Group is forward looking, demonstrated with our significant investment in robotic dispensing technology. We use cutting-edge robotic dispensing technology in 6 of our sites which has improved the speed, efficiency, and accuracy of the dispensing services we provide. This technology alone dispenses 50,000 prescriptions per week, giving our staff more time with our patients, and to provide pharmacy services to the community.
